DETAILED ACTION

1. This application claims benefit of the foreign application:
GERMANY 103 53 759.7 with a filing date 11/17/2003.
2. Claims 1-15 are pending in the application.

Information Disclosure Statement

3. Applicant's Information Disclosure Statement filed on May 16, 2006 has been considered. Please refer to Applicant's copy of the 1449 submitted herein.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 5, recites the limitation "corresponding derivative" is indefinite and ambiguous. It is unclear what the scope of "corresponding derivative" is. The range of "corresponding derivative" of claims 1 is from any phosphonic acid or phosphinic acid. Such breadth in view of the limited exemplification and the lack of scope of subject matter resulted from a search of the prior art indicated that the "scope" of claims 1-15 can not be ascertained. In view of the high degree of unpredictability of the chemical art and "corresponding derivative" must be made available at the time the invention was made, i.e., filing of application, the broad scope can not be supplemented with future

discovery of new "corresponding derivative". It is recommended that "corresponding derivative" be limited to the specific disclosure of compound, i.e., see Examples 1-11 on pages 8-15. Dependent claims 2-15 are also rejected along with claim 1 under 35 U.S.C. 112, second paragraph.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of Ignatyev et al. US 7,202,379. Although the conflicting claims are not identical, they are not patentably distinct from each other and reasons are as follows.

Applicants claim a process of making mono-(fluoroalkyl)- or bis(fluoroalkyl) phosphoric acids, mono(fluoroalkyl) or bis-(fluoroalkyl) phosphates by reacting bis(fluoroalkyl) phosphoric or a corresponding derivative (i.e., phosphoranes) with hydrogen fluoride, see claim 1.

Ignatyev et al. claim a process of making bis(perfluoroalkyl) phosphinic acids (i.e., bis(fluoroalkyl) phosphoric acids, or bis-(fluoroalkyl) phosphates) by reacting difluorotris(perfluoroalkyl) phosphorane (i.e., corresponding derivative) with hydrogen fluoride, see columns 11-12.

The difference between the instant claims and Ignatyev et al. is that the instant claims are silent on the scope of the corresponding derivative. Ignatyev et al. processes inherently overlap with the instant invention.

One having ordinary skill in the art would find the instant claims 1-15 *prima facie* obvious **because** one would be motivated to employ the compounds of Ignatyev et al. to obtain the instant processes. Dependent claims 2-15 are also rejected along with claim 1 under the obviousness-type double patenting.

The motivation to obtain the claimed compounds derives from known Ignatyev et al. processes would possess similar yields to that which is claimed in the reference.
